

tribb01 Badge Notes

You have one of the first Beyond Binaries badges! It's a small run this year, so lucky you! Here's a little info to get you started.

Buttons

- Button 1 - Cycle color patterns
- Button 2 - Cycle color transitions
- Button 1 & 2 - Toggle Brightness (LOW - MEDIUM - HIGH - MAX)*

**Adjust brightness at your own risk. The max setting will literally sear your all of your eyeballs.*

Please Hack on this Badge!

This badge is really easy to hack on! You can get started at <https://tribb01.party/badge>.

Enjoy!

Special thanks to Avi for help concepting and to Twinkie for help testing and assembling.

If you want to support the development of this badge and future badges, feel free to contribute. Next year, we'll be scaling up production with a bigger build and a whole lot more badges.
